## Ampliar la participación y fortalecer el Espacio Europeo de Investigación

Ampliar la participación y difundir la excelencia

Reformar y mejorar el sistema europeo de I+I

- Es un mercado único y sin fronteras para la investigación y la innovación que fomenta la libre circulación de los investigadores, los conocimientos científicos y la innovación, y **promueve una industria europea más competitiva**.
- Ayuda a los países a ser más eficaces actuando juntos, al alinear de forma estrecha sus políticas y programas de investigación. La libre circulación de investigadores y conocimientos permite una mejor cooperación transfronteriza, la creación de una masa crítica y la competencia a escala continental.
- La difusión de la investigación y la innovación de excelencia desempeña un papel fundamental en la mejora del sistema europeo de investigación e innovación para que pueda impulsar las transiciones digital y climática, y contribuir a la recuperación de la pandemia de COVID-19

COUNCIL RECOMMENDATION (EU) 2021/2122

of 26 November 2021

on a Pact for Research and Innovation in Europe

IN  
ICIAL

1. The European Research Area in a new context

The European Research Area (ERA) was launched in 2000, in the context of the Lisbon strategy, to address the fragmentation of the EU's research and innovation system, which at the time consisted of the juxtaposition of the national R&I systems and an EU level funding programme.

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 292 in conjunction with Article 182(5) thereof,

Having regard to the proposal from the European Commission,

Future
